# **SITUATION SUMMARY**

## **Boil Water Order , Escondido, San Diego County (No Change)**

- The Boil Water Notice includes Palomar Health Center. The Regional Disaster Medical Health Specialist (RDMHS) for Region VI is in contact with the hospital and issues medical situation reports every twelve hours. The hospital is using canned and bottled water, paper plates and disposal cups as a precaution. Testing continues but the RDMHS VI advises Saturday's testing was negative for coliform bacteria. The SDO continues to monitor the situation and coordinating with the San Diego County OES Duty Officer and the RDMHS VI.
- The Cal OES Southern Duty Officer advised of a Boil Water Notice has been ordered for the City and Unincorporated areas of Escondido, San Diego County due to the appearance of a buildup of coliform bacteria. Rincon del Diablo Water District is advising residents in District ID 1, Pressure Zone 3 to use boiled tap water or bottled water for drinking or cooking purposes as a safety precaution.
- Rincon del Diablo Water District has reported that over 40 samples have been taken and is currently looking to what caused the coliform bacteria. This is a standalone Water Quality issue and is not related to the Drought in California. This incident has attracted local media attention.
- State Water Boards Drinking Water Program (DWP) Duty Officer advised through his Regional contact that these types of notices are routine work for a district office and can be lifted by Sunday evening at the earliest. Cal OES Southern Region continues to stay in contact with San Diego County.
- There are no requests for assistance or unmet Access and Functional Needs issues.

## **City of Needles Severe Weather Incident, San Bernardino County (No Change)**

### **Situation**

On Tuesday, August 12, 2014 at approximately 1630 hours a severe thunderstorm settled over the City of Needles causing flooding and wind damage. The City of Needles reported a minimum of 50 downed power lines, damage to roofs, and multiple downed trees. A determination has yet to be made if this incident may be linked to the August Severe Weather Incident.

- A local proclamation was received August 14, 2014 from the City of Needles for heavy rain, flooding and adverse weather conditions. The Proclamation is requesting a Governor's Proclamation including CDAA, a Small Business Administration declaration and any State or Federal funding. Initial damage estimates continue.
- Initial Damage Information has been received for the City of Needles. Crews are still out and the damage information may change. Current Public Assistance damage is just over \$2.3 million including personnel overtime costs and estimated costs of Debris Removal (Category A), Road and Bridge Systems (Category C) and Public Utilities (Category F). Individual Assistance damage includes 15 homes and one business destroyed, and 250 homes affected.

## **Port of Oakland Protest (No Change)**

On 8/17/14 at 1633 hours, the Cal OES Law Enforcement Duty Officer spoke to an OPD Lt., who advised that the ship is in route with an ETA into the Port of Oakland in the next 1/2 hour or so. There has been no significant social media traffic about another protest today. OPD is operating with a skeleton crew with no expectation for a LEMA request. OPD has provided the LDO with the Operations Commander contact for updates regarding the status of the scheduled entry of the ship into the Port and whether there is any protest activity at/near the Port. At 1640 hours the LDO contacted an OPD Captain who advised the ship is passing under Bay Bridge at this moment. OPD has Units monitoring the movement along with the Coast Guard. OPD restated what Lt. Lau advised, in that there has been very little social media activity and there is no evidence of any gatherings downtown or elsewhere to indicate an imminent march/protest.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

An approaching upper level low will pass over northwest California today and will bring a threat of showers and thunderstorms to parts of the interior into Tuesday. Otherwise, seasonal temperatures will persist for the next few days with low clouds along the coast each night and morning.

#### **San Francisco Weather:**

An upper level low pressure system will move from north to south across the San Francisco Bay Area and North Central Coast from late Monday through early Tuesday. This will result in cooler than normal temperatures across most of the forecast area through midweek. Night and morning low clouds will persist along with patchy drizzle near the coast through Tuesday. Modest warming is forecast late in the week.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Temperatures will cool to around normal this week as a weak low pressure system drops southward off the coast of California. The mountains may see a few thunderstorms the next couple of days, otherwise dry weather will continue.

#### **Hanford Weather:**

An upper level trough of low pressure will move down the California coast and bring a cooling trend through Tuesday, then little change in temperatures will occur for the remainder of the week.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

An approaching trough of low pressure will increase onshore flow, deepen the marine layer, and bring a cooling trend through Thursday. It is possible that subtropical moisture could move north for late week bringing humid conditions and a chance of showers.

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

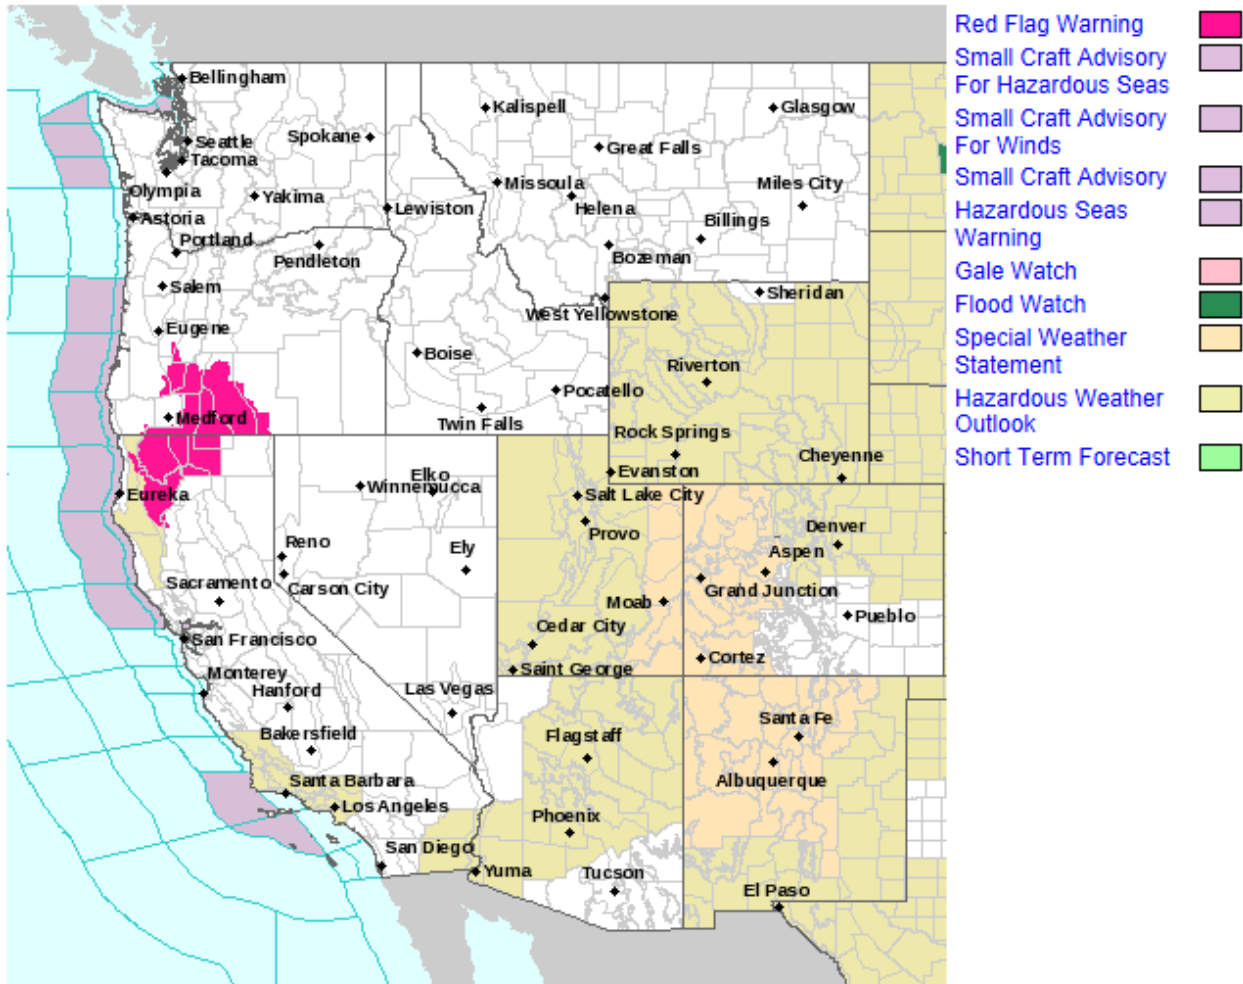

An increase in lower level moisture from thunderstorm outflow will bring a slight chance of thunderstorms this afternoon for the San Diego County Mountains and Deserts and the Riverside County Mountains. A low pressure system along the Pacific Northwest Coast will move southward along the West Coast, moving into Southern California Tuesday night, then stalling near Southern California through Friday. This will bring cooling and deepening of the marine layer. This may draw tropical moisture northward into the area bringing a slight chance of showers and thunderstorms as early as Tuesday night and continuing at times into Friday.

#### **Southeast California Weather:**

An early season Pacific low pressure system will approach the area today and will draw even more monsoon moisture northward back into the forecast area. With the increase in humidity and clouds, below normal temperatures are possible by Tuesday and will likely continue through the remainder of the workweek.

### Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 14<sup>th</sup>: Don Pedro 42%; Exchequer 18%; Folsom Lake 40%; Lake Oroville 33%; Millerton Lake 48%; New Melones 25%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 32%; Pyramid Lake 94%; and Castaic Lake 45%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water<sup>1</sup> to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.

- Cal OES continues to gather drought-related costs from state agencies and local governments.
